WORK EXPERIENCE

- **Lexcode Inc.** May 2024 - Present
Front-End Web Developer
 - **AI English Tutor - Web Application**
 - Developed a cross-platform mobile application that provides AI powered English tutoring.
 - Collaborated with Backend Developers to integrate speech-to-text capabilities.
 - Leveraged Firebase for real-time data synchronization and scalable user management.
 - **Company Website - Translation & Interpretation Services**
 - Developed pages of the website showcasing comprehensive translation and interpretation services using WordPress and Elementor.
 - **Transcriber Web App**
 - Engineered a web application to transcribe audio and video content into text with high accuracy.
 - Integrated Firebase to ensure secure, real-time data handling and robust scalability.
 - **QR Certification Verification Portal**
 - Developed a third-party website allowing clients to verify the authenticity of translated documents using QR codes.
 - **Interpretation Web App**
 - Built a real-time web application for live event interpretation, bridging communication between speakers and listeners.
 - Implemented fast-loading interfaces with Vite and TypeScript, and designed responsive UIs using Tailwind CSS.
 - Integrated MongoDB and FastAPI to manage and monitor real-time data communication efficiently during live translations.
 - **Rental Equipment Calculator**
 - Developed an e-commerce style calculator to allow clients to browse and rent interpretation equipment online.
- **Metrobank** January 2023 - May 2024
Middleware Administrator
 - Create and manage the marketing budget, ensuring efficient allocation of resources and optimizing ROI.
 - Oversee market research to identify emerging trends, customer needs, and competitor strategies.
 - Monitor brand consistency across marketing channels and materials.
- **Batangas State University - STEER HUB** June 2021 - July 2021
Middleware Administrator
 - Mobile Frontend: Developed and implemented user-friendly mobile interfaces to enhance user experience.
