Professional Summary

Frontend developer specializing in React/TypeScript frontends and Python/FastAPI backends, with proven expertise building real-time web applications. Skilled in creating scalable, production-ready systems with modern frameworks, database integration, and WebSocket technology. Strong background in enterprise infrastructure management and full-stack development.

Work Experience

Frontend Developer

Lexcode Inc., Philippines | May 2024 - Present

- Architected and deployed full-stack web applications using React, TypeScript, and Next.js for frontend, with FastAPI and Python backends integrated with MongoDB databases.
- Engineered real-time features using WebSocket technology for live data streaming and bidirectional client-server communication.
- Developed responsive, mobile-first user interfaces with Tailwind CSS, ensuring cross-device compatibility and optimal user experience across all screen sizes.
- Built complex business logic systems including dynamic pricing calculations, discount algorithms, and multi-currency support with real-time conversion.
- Implemented automated document generation and delivery systems with PDF creation, email integration, and QR code verification features.
- Created scalable RESTful APIs with comprehensive CRUD operations, authentication, and role-based access control.
- Designed and maintained content management systems using WordPress and Elementor Pro for client-facing web properties

Middleware Administrator

Metrobank, Taguig City | January 2023 - May 2024

- Managed enterprise-grade Oracle Fusion Middleware and WebLogic Server infrastructure, ensuring 99.9% system uptime and reliability.
- Monitored system performance metrics, diagnosed complex technical issues, and implemented solutions to maintain optimal server performance.
- Executed security protocols, vulnerability assessments, and system upgrades to maintain compliance with enterprise security standards.
- Collaborated with cross-functional teams to troubleshoot integration issues and optimize application deployment processes.

Skills

Frontend Languages

HTML, CSS, JavaScript, TypeScript, React, Next.js, Vite, Tailwind CSS

Backend Languages

Python, REST APIs, NodeJS, PHP
